

HANSINI SAMARATHUNGA

BUSINESS ANALYST | PRODUCT ANALYST | ASPIRING PRODUCT MANAGER

SUMMARY

Final-year BSc (Hons) Computer Science undergraduate at NSBM Green University, affiliated with Plymouth University (UK), with experience in business analysis, product development, system analysis, requirement gathering, stakeholder communication, Agile methodologies, and software documentation. Contributed to AI, healthcare, IoT, and software development projects by translating business requirements into technology solutions. Skilled in process analysis, user story creation, stakeholder collaboration, and project coordination. Seeking internship opportunities in Business Analysis, Product Management, Digital Transformation, and FinTech.

PROJECTS

EmoSense – AI-Powered Emotion Recognition & Mental Wellness Platform

Technologies: **React.js, Django, TensorFlow, OpenCV**

- Conducted requirement analysis, system design, testing, and project documentation.
- Planned user journeys, feature workflows, and recommendation functionalities.
- Developed an AI-powered emotion recognition platform with personalized wellness recommendations.
- Collaborated on system planning and user experience improvements.

FloodSense – IoT-Based Flood Monitoring & Early Warning System

Technologies: **Flutter, ESP32, IoT Sensors**

- Conducted requirement gathering and stakeholder needs analysis.
- Participated in system analysis, validation, and documentation activities.
- Supported software and hardware integration planning.
- Contributed to testing and evaluation processes.

DocuHealth – Patient Record Management System

Technologies: **Next.js, React.js, MongoDB**

- Contributed to workflow analysis and requirement documentation.
- Assisted in process improvement initiatives to enhance operational efficiency.
- Participated in testing and validation activities.
- Supported user experience enhancement efforts.

PetPals – Mobile Application (Team Lead)

Technologies: **Flutter, Firebase**

- Led project coordination and task allocation throughout the development lifecycle.
- Facilitated communication among team members and monitored project progress.
- Contributed to feature planning, UI/UX discussions, and sprint execution.
- Ensured timely completion of project milestones.

EDUCATION

Bachelor of Science (Hons) in Computer Science

NSBM Green University / Plymouth University (UK)

2023 – Present

Relevant Areas:

- Business Analysis & System Analysis
- Human-Computer Interaction (HCI)
- Artificial Intelligence & Machine Learning
- Big Data Analytics
- Full Stack Development
- Mobile Application Development
- Software Development Practices
- Database Management Systems
- Internet of Things (IoT)
- Computing Group Project

SKILLS

Business Analysis

- Requirement Gathering
- Requirement Analysis
- Business Process Analysis
- Process Mapping
- User Stories
- Use Cases
- Functional Requirements
- Non-Functional Requirements
- Stakeholder Communication
- SDLC

Agile Methodology

- Scrum
- UML Documentation

Product Management

- Product Development Lifecycle
- Product Planning
- Feature Prioritization
- Sprint Planning
- Backlog Management
- User-Centered Design
- Product Documentation
- Team Coordination

Technical Knowledge

- SQL
- MySQL
- MongoDB
- REST APIs
- React.js
- Flutter
- Django
- Git & GitHub

Tools

- Jira
- Trello
- Figma
- Draw.io
- Lucidchart
- Microsoft Excel
- Microsoft Word
- Microsoft PowerPoint

COMMUNITY ENGAGEMENT & LEADERSHIP

Council Member – NSBM FOSS Community (2025–2026)

- Coordinated technology-focused events and student engagement initiatives.
- Collaborated with teams to organize community activities and programs.

Women in FOSS – Organizing Committee Member

- Supported event planning, outreach, and community engagement activities.
